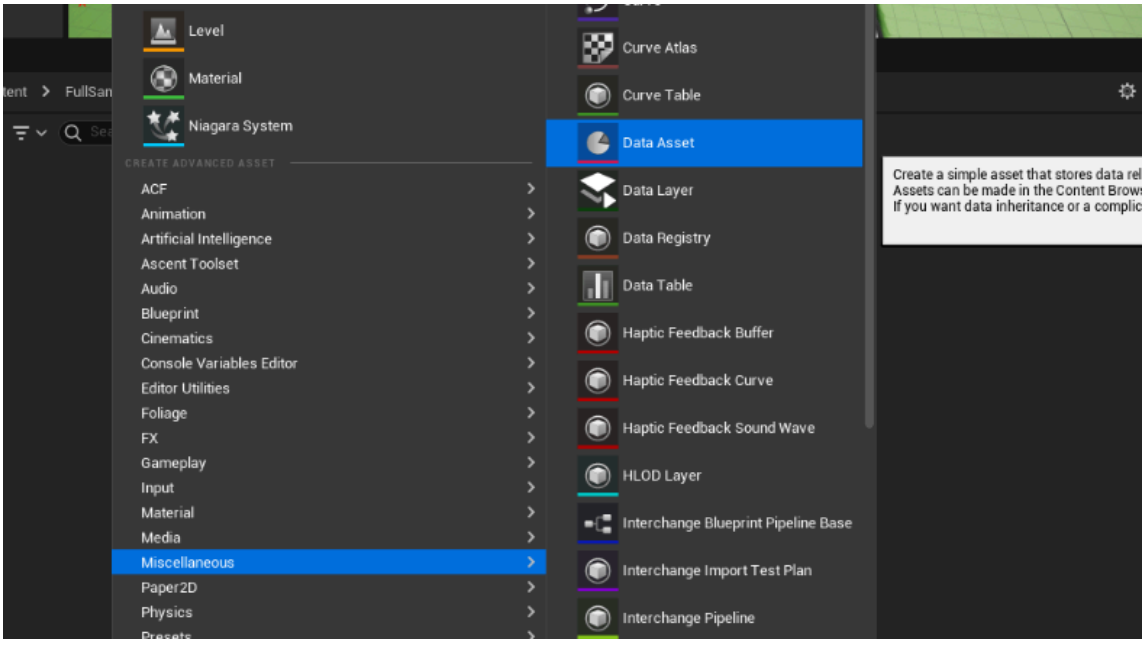
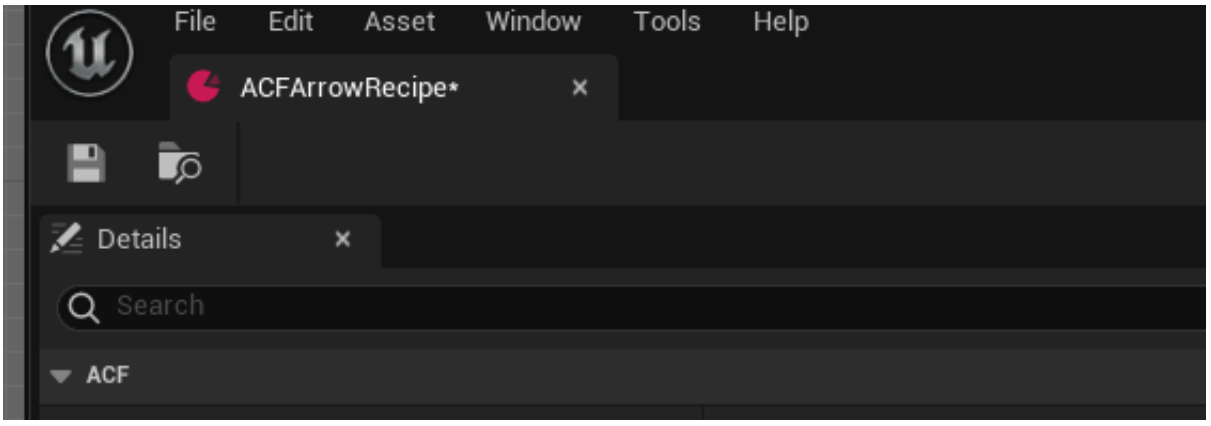
Crafting & Procedural Items - UPDATED!

1. Creating new recipes

Recipes in ACF are made throught data asset, to create a new crafting recipe you'd need to create a new data asset of type **ACFCraftRecipeDataAsset.** To create it you'd just need to right click in your content browser and select Miscellaneus -> Data Asset and select the **ACFCraftRecipeDataAsset**.





Configure the Data Asset to match the desired recipe, in this case:
