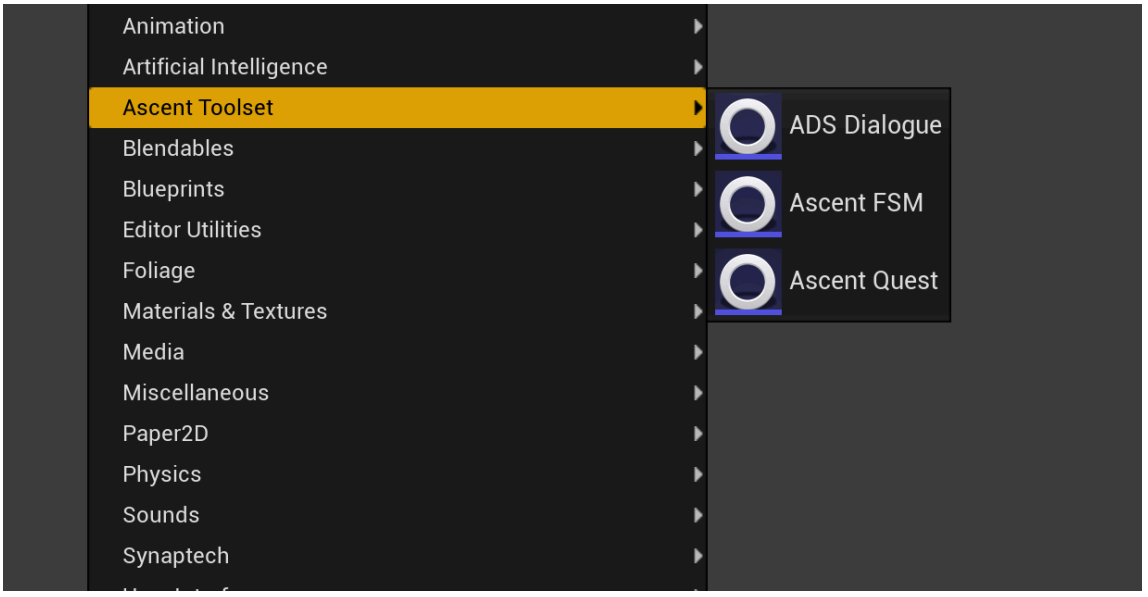
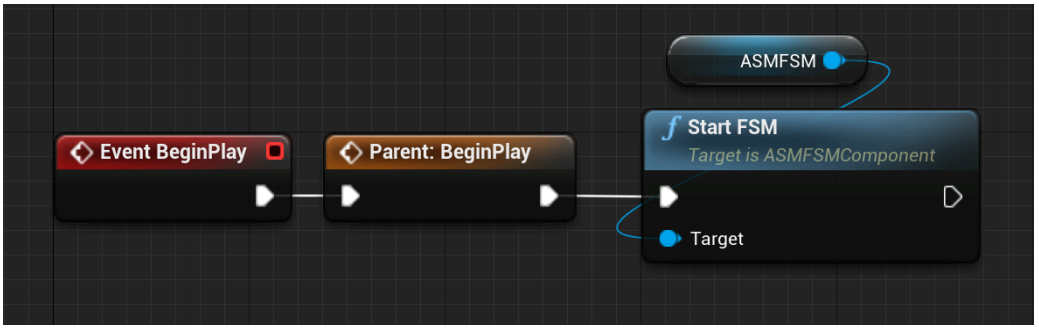
Finite State Machine

1.1 Creating an FSM

To create an FSM you can just right click in content browser and select *AscentToolset->Ascent FSM*. Clicking on the newly create asset will allow you to edit the FSM.



1.2 Starting an FSM


To start an FSM you need to add the *UASMFSMComponent* to any actor of your choice and then set the newly created FSM in the Property Editor. Then you just have to call the *StartFSM* Node from the component.
