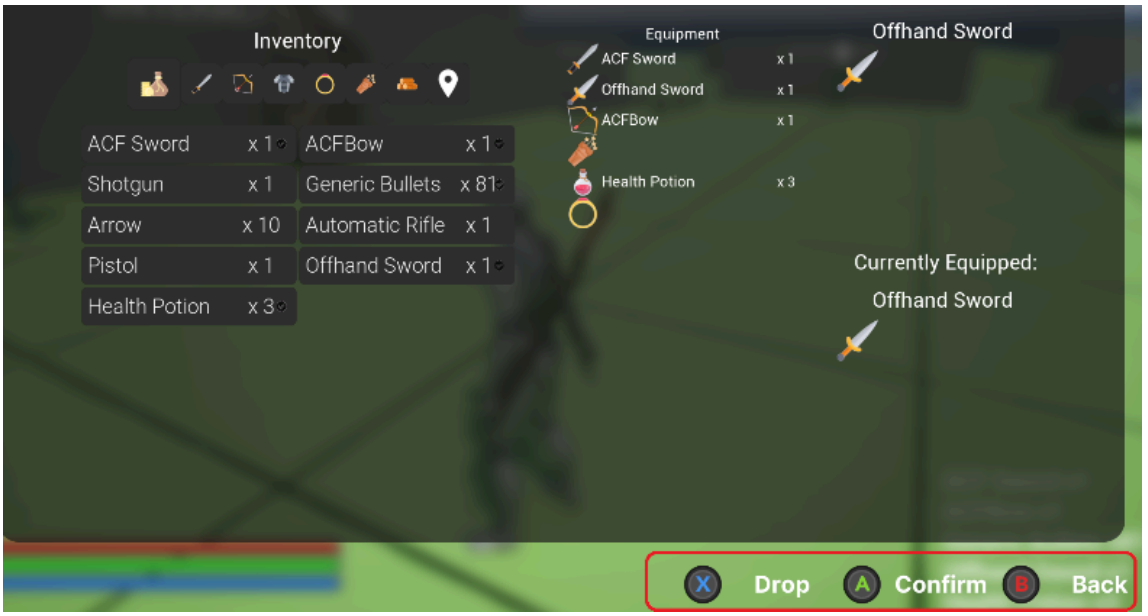
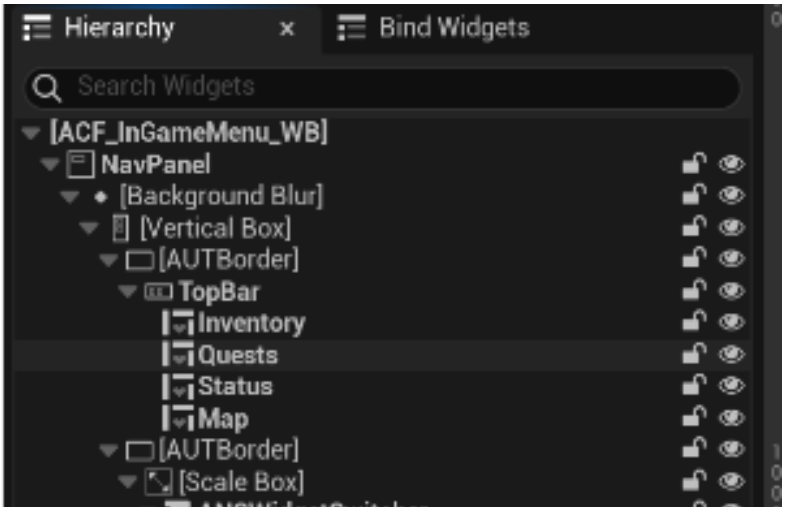
# Navbar Setup

### What is a Navbar?



Navbar is a very common widget in modern games which significantly simplifay keyboard / gamepad interaction with the interface by givin to the users a list of actions he can trigger by simply pressing the relative button while navigating a certain menu.

### Adding a Navbar



To add a Navbar just drag and drop the *ANS_Navbar_WB* widget in to your widget tree and configure it.

In his properties you'll need the action that can be triggered from
