Quest System

1.1 AQSQuestManagerComponent

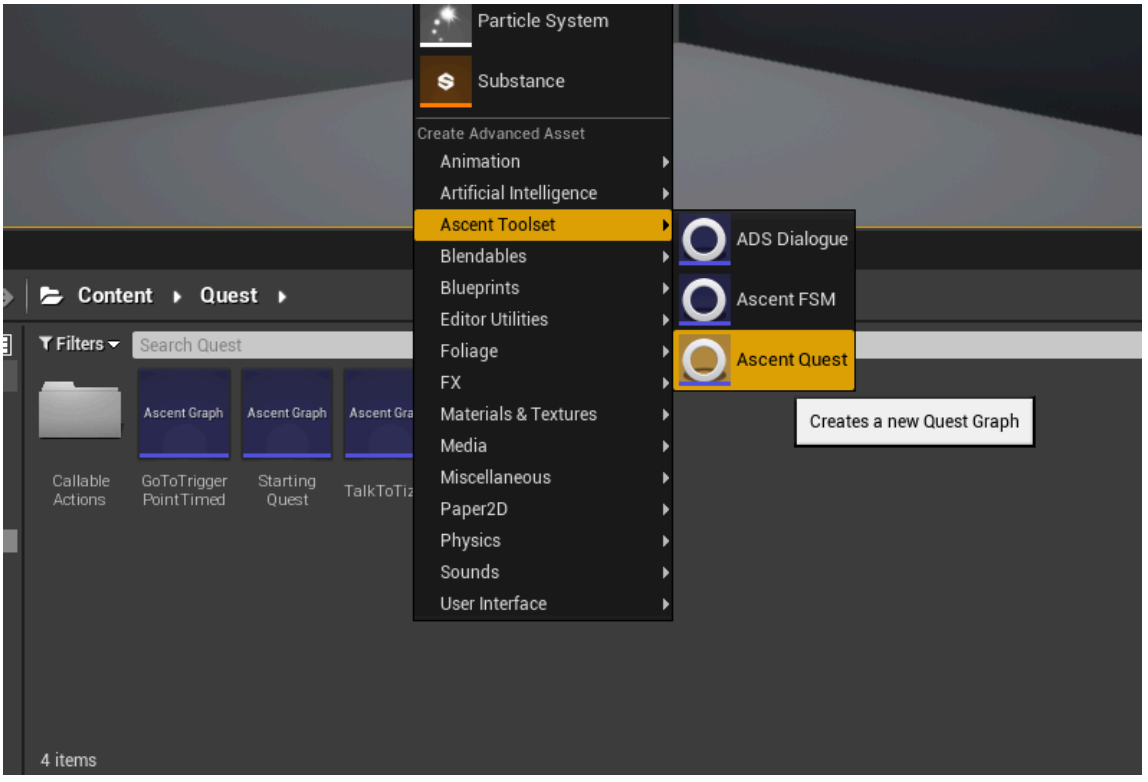
This needs to be added to the player controller. It contains all the functions to start / proceed / complete quests and relative events.
More info here.

1.2 AQSQuestTargetComponent

This needs to be added to any actor that can be a referenced target for a quest.

1.3 Creating a New Quest

You can create a new Quest object in the Editor by simply right clicking in the Content Broser → Ascent Toolset → Ascent Quest



Setting Quest Details

In the graph with no nodes selected you will have options
